

April Review & Northeast DEWS Discussion

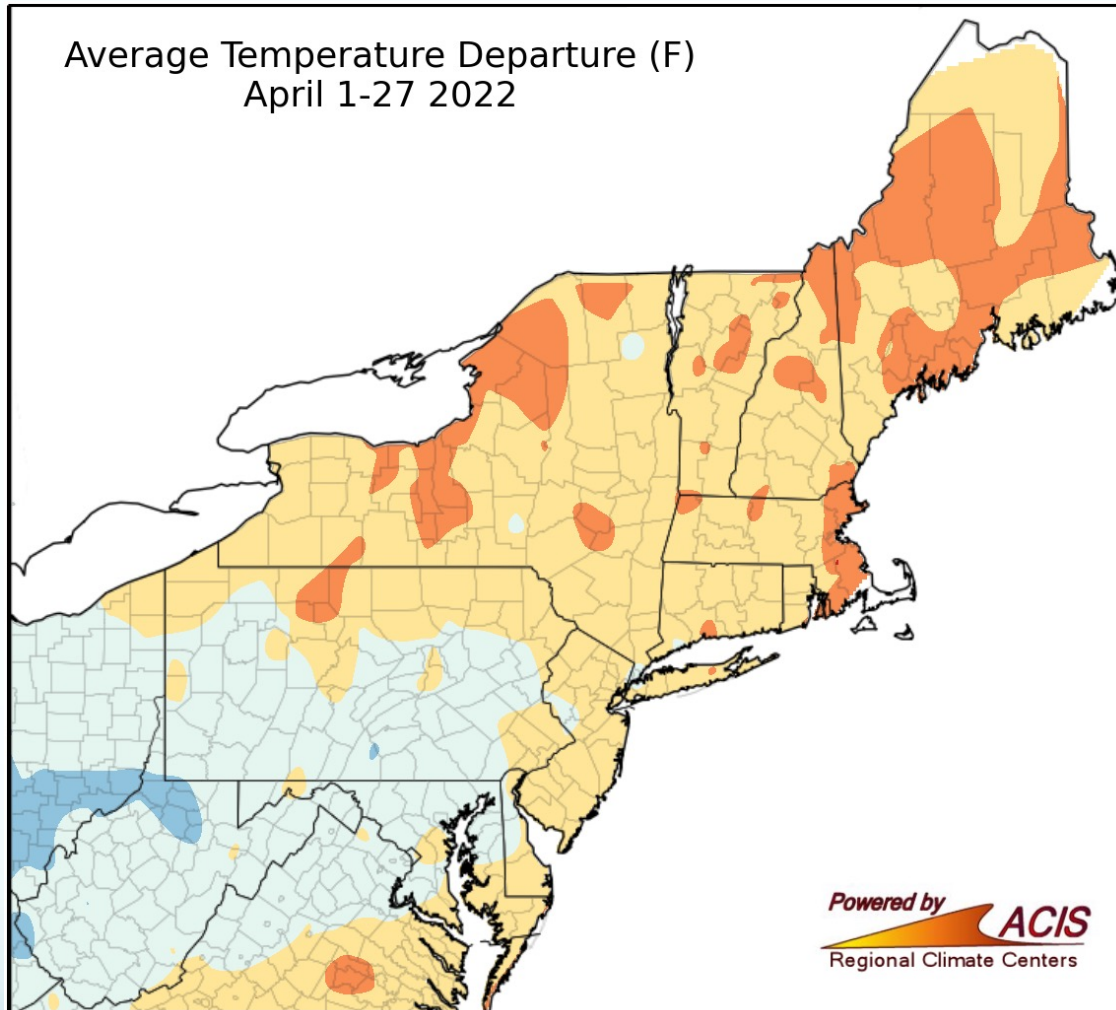

By: Jessica Spaccio, Climatologist
Northeast Regional Climate Center

Northeast Regional
Climate Center

April Temperatures

From 4°F below normal to 4°F above normal

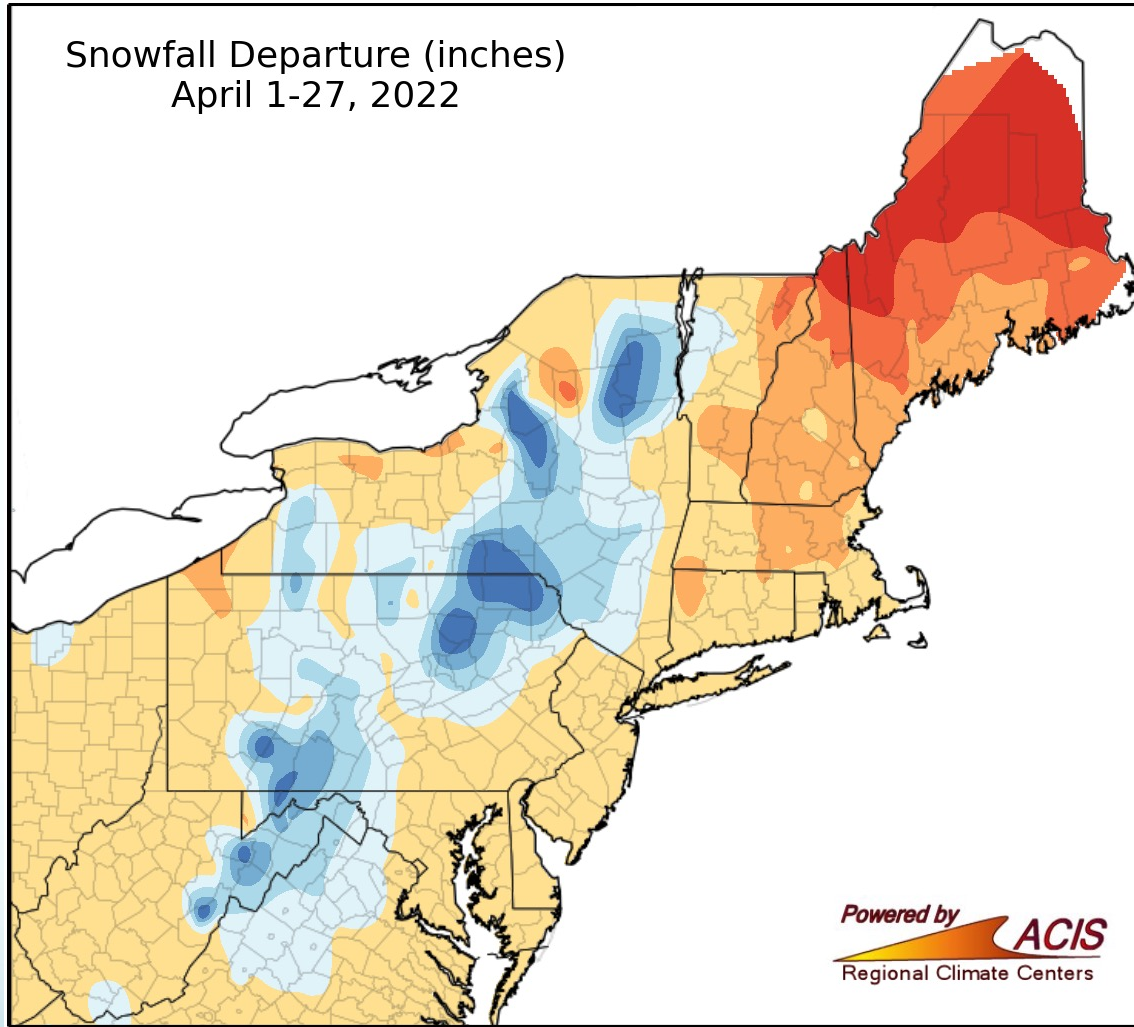

April Precipitation

From 50% of normal to 200% of normal

April Snowfall

Snowfall Departure (inches)
April 1-27, 2022

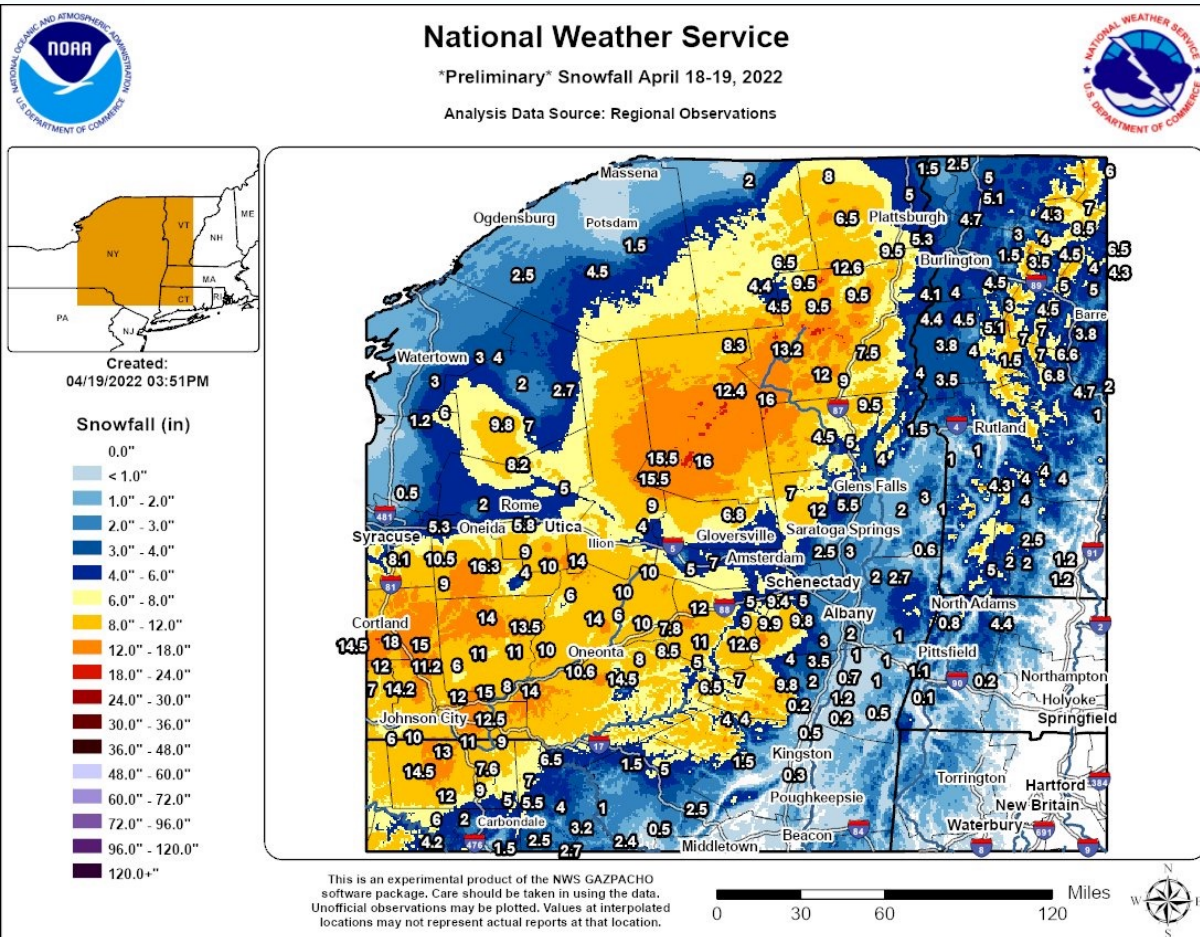

Powered by
ACIS
Regional Climate Centers

From more than 6" below normal to 6" above normal

Late-Season Nor-Easter

April 18-19

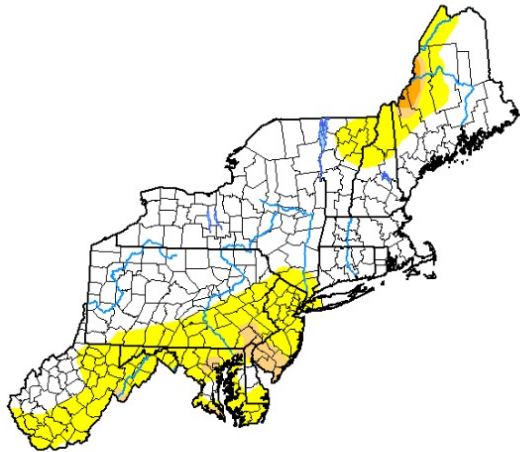

- 12-18" of snow in NY & PA
- 14.6" in Binghamton, greatest 2-day April total
- 300,000 lost power in Northeast

Summary

April-to-date conditions:

- Most of the region had temperatures within 2 degrees of normal
- Near-normal to above-normal precipitation in many areas
- Above-normal snowfall for areas hit by nor'easter, below-normal in New England

Drought:

- Northern New England:
 - Severe drought removed in Maine; improvement of abnormally dry conditions
- Southern parts of the Northeast:
 - Improvement in PA & NJ; lingering abnormally dry conditions and small areas of moderate drought

Outlooks:

- Next seven days – cool temperatures; frontal system brings precipitation to southern areas over the weekend
- Short-term outlooks – near- or above-normal precipitation, range of temperatures changing to below-normal for the 8-14 day outlook
- Month/three-month outlooks call for above-normal precipitation and a range in temperatures for May and above-normal temps for MJJ.
