Wildfire Risk

HAZY SKIES & POOR AIR QUALITY: Through Friday

Air Quality and Health

Exposure to air pollutants such as particulate matter and ground-level ozone can cause:

- Headaches
- Irritated eyes, sinuses
- Fatigue
- Difficulty breathing
- Chest pains, asthma attacks
- Irritated throat, increased coughing

Poor air quality can be hazardous to anyone, and it can aggravate health problems such as asthma, heart disease, and lung disease. Seniors, children and those with compromised immune systems are especially at risk.

Precipitation Forecast

Short-term Outlooks

Summary

November-to-date conditions:

- Below or near-normal temperatures for many areas
- Below-normal precipitation for most of the region

Drought:

- Below-normal precipitation generally allowed drought and dryness to persist or expand

Outlooks:

- Short-term: Below- or near-normal precipitation and temperatures favored for 6-10 day; Near- or above-normal precipitation and temperatures favored for 8-14 day
- Dec: Updated outlook released later this morning!
- Dec-Feb: Michelle will discuss!
