Precipitation Forecast

Short-term Outlooks

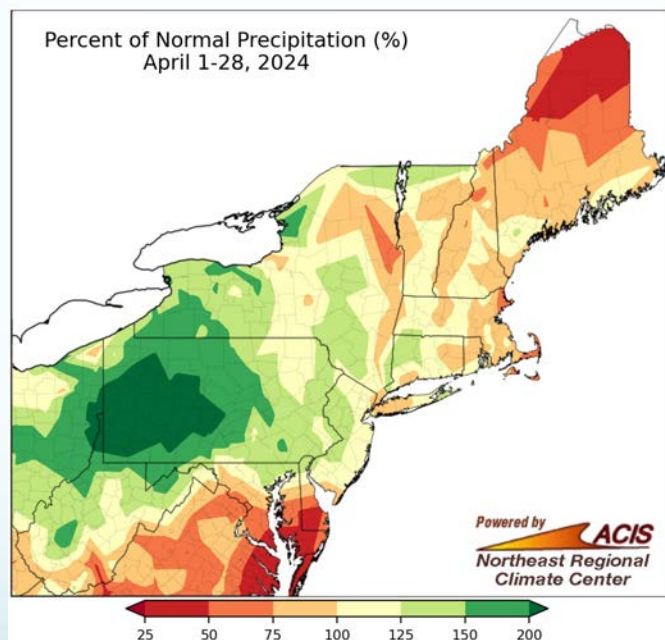

Monthly & 3-Month Outlooks

Summary

April-to-date conditions:

- Near- or above-normal temperatures for much of the region
- Precipitation varied – dry in far northern/southern spots but wet interior areas
- Below-normal snowfall for many; above-normal for northern New England

Drought:

- Moderate drought erased from region for the first time since spring 2023
- Abnormal dryness persists in western New York and on Nantucket

Outlooks:

- Short-term: above-normal precipitation for both time periods; near- or above-normal temperatures for both time periods
- May and May-July: above-normal precipitation for southern areas and above-normal temperatures for all
